DIRECTORS' REPORT

Dear Members,

Your Directors are pleased to present the 37th Annual Report with the Audited Financial Statement of your company for the financial year ended on March 31, 2023.

1. STATE OF COMPANY AFFAIRS

The Reconstituted Board of Directors presents to the Members the 37th Annual Report of the Company on the business and operations of the Company together with the Audited Statement of Accounts for the year ended 31st March, 2023.

The Corporate Insolvency Resolution Process ("CIRP") was initiated, on a petition filed by SREI Infrastructure Finance Limited under Section 7 of the Insolvency and Bankruptcy Code 2016 ("IBC 2016"), against the Company, which was admitted vide an order of Hon'ble National Company Law Tribunal ("NCLT"), Ahmedabad Bench dated July 21, 2017.

Upon the commencement of CIRP, in pursuant to the Section 17(1)(b) of the IBC 2016, the power of Board of Directors stands suspended and be exercised by the interim resolution professional. That pursuant thereto, on July 21, 2017, Hon'ble NCLT appointed Mr. Kuldeep Verma as the Interim Resolution Professional (IRP) in terms of IBC, who was subsequently confirmed as Resolution Professional (RP) by Committee of Creditors (CoC), on August 22, 2017 constituted under IBC.

Mr. Kuldeep Verma, in his capacity as RP, has taken control and custody of the management and operations of the Company with effect from July, 2017. As per the Code, the Resolution Professional ("RP") has to receive, collate and admit all the claims submitted by the creditors of the Company.

RP and Committee of Creditors ("COC") did not receive any Resolution Plan for revival of KSOIL within the time limit prescribed under code, then filed an application of liquidation in April 2018, before the Adjudicating Authority ("AA") to liquidate the company. However, the AA dismissed the application. Then, in 2022, the RP filed Company Appeal (AT) (Insolvency) No. 98 with the National Company Law Appellate Tribunal ("NCLAT") in New Delhi. The NCLAT has passed the order of liquidation ("Liquidation Order") dated March 16, 2022, and the RP was appointed as liquidator of KSOIL.

After following due process of law as prescribed under the IBC and the Insolvency and Bankruptcy Board of India (Liquidation Process) Regulation, 2016 ("Liquidation Regulation"), the Liquidator successfully conducted the E-Auction for sale of KSOIL (as an entity), wherein bid submitted by Sherisha Technologies Private Limited ("STPL" and "Successful Bidder") submitted its EOI to the liquidator for the purpose of participating in the E-auction. After that Liquidator issued a letter of intent, declaring the STPL highest and successful bidder. Further Liquidator has issued Certificate of Sale to the Successful bidder. In accordance with Process documents, STPL has acquired KSOIL ("Corporate Debtor") through Soy-Sar Edible Private Limited ("Special Purpose Vehicle" or "SPV/SEPL").

In addition to the above, the application in IP Inv.P/7(MP)2024 is filed by SEPL and STPL in respect of acquisition of K. S. Oils Ltd (Corporate Debtor) in liquidation as a going concern (excluding certain assets, defined as "Excluded Assets") in accordance with Regulation 32(e) and Regulation 32A of the Liquidation Regulations (Auction Asset) and the Hon'ble NCLT, Indore Bench has passed the order ("Approved Order") for the same vide dt. February 03, 2025.

Further, Member may note that during the CIP/Liquidation period, the National stock exchange ("NSE") and Bombay Stock Exchange "BSE" delist the company on April 27, 2018 and BSE on May 05, 2018 during the moratorium period and contravention of the provisions under Section 14 of the IBC Code 2016. One of the reliefs we seek in the above said petition is for the relisting of Equity Shares of K.S. Oils Limited in both the NSE and BSE. This petition was granted. We followed this up with a formal application to the Stock Exchanges, and the stock exchanges have issued a Circular of withdrawal of Delisting of Equity Shares of K.S. Oils Limited (KSOILS) and the status of the Company was changed from "Delisted" to "Suspended" w.e.f May 05, 2025. Now your Company is in process of comply the all compliance.

Mr. Kuldeep Verma was appointed as an Interim Resolution Professional ("IRP") and he was later confirmed as its Resolution Professional ("RP"). As Resolution Plan could not come-up within the maximum statutory period of 270 days, the Committee of Creditors had approved for seeking liquidation order and accordingly RP had filed an application before the Adjudicating Authority seeking liquidation order. However, vide order dated Jan 01, 2022, the Adjudicating Authority had dismissed the said liquidation application. The order was then challenged before the Hon'ble NCLAT and Hon'ble NCLAT vide its order dated March 16, 2022 had set aside the order of the Adjudicating Authority and directed for the liquidation of KS Oils. Mr. Kuldeep Verma, RP of KS Oils was appointed to continue as a Liquidator of KS Oils

In the course of the liquidation process of KS Oils, on November 22, 2023, the Liquidator issued a public announcement in various newspapers, inviting Expressions of Interest (EOI) from prospective bidders, for sale of, inter alia, Block-A, i.e. the KS Oils as a going concern (excluding certain assets, defined as "Excluded Assets").

Refex Holding Private Limited (Formerly known as Sherisha Technologies Private Limited) ["RHPL"] had participated in the auction process for acquisition of KS Oils as a going concern (excluding certain assets) and in terms of Process Document & On December 22, 2023, the E-Auction was conducted by the Liquidator for the sale of KS Oils as a going concern. RHPL's bid for the Auction Asset turned out to be the highest. To acquire KS Oils through SPV, RHPL has incorporated Soy-Sar as a SPV for facilitating the acquisition of KS Oils as a going concern. In Subsequent to this, the Liquidator has issued a Sale Certificate to Soy-Sar on March 22, 2024.

In the above factual backdrop, the Soy-Sar and RHPL, has approached Hon'ble NCLT, Indore Bench for seeking certain directions, approvals, reliefs for effectuating and facilitating the transfer of the KS Oils as a going concern on a clean slate basis in favour of Soy-Sar. Hon'ble NCLT, Indore Bench vide Order dated February 03, 2025 (hereinafter referred to as "NCLT Order dated February 03, 2025") had granted various reliefs and concessions to enable sale of the KS Oils to Soy-Sar (including an approval of Relisting of KS Oils Limited.

- (1) the shareholding pattern reflects the correct shareholders as per Approved NCLT Order, and
- (2) the reduced capital is reflected in the records of stock exchanges and depositories.

Emphasis of Matter

We draw attention to the following matters:

1. The Corporate Insolvency Resolution Process has been initiated against the company under the provision of insolvency and bankruptcy Code 2016 by an order of National Company Law Tribunal with effect from 21st July 2017. Further Mr. Kuldeep Verma was appointed as Liquidator (RP) and confirmed as Liquidator (RP) with approved of Committee of Creditors (COC) at their meeting held on 22nd Aug 2017. On 16th March 2021; he was appointed as the Liquidator. The powers of Board of Directors stand suspended and such powers were vested with Mr. Kuldeep Verma appointed as the Liquidator with respect to the company.

2. Note No 30 of the financial statements regarding inventories. Closing stock of inventory has been taken as 922 Lakhs in the Balance sheet but we could not ascertain the value of such inventory.

3. As per the IBC code the RP has to receive, collate and reconcile all the claims submitted by the creditors of the company. The RP has verified and admitted the claims submitted by the creditors against the company as per the Code. Accounting impact in the books of accounts has not been made in respect to excess, short or non-receipts of claim or liabilities for financial and operational creditor as the Resolution plan has been approved during the subsequent year on 21st July 2017. On 16th March 2021, the company went into Liquidation.

4. As per “Indian Accounting Standard 36”, “Impairment of Asset”, if the carrying amount of the asset is more than recoverable amount then asset need to be impaired and as per “Indian Accounting Standard 109” on financial assets through expected credit loss method basis these provisions we were required to seek for any impairment obligations from management, since the Company was under the process CIRP the management determined value in use as on 31st March 2023 by and taking depreciation for the intervening period thus the property, plant & equipment has been depreciated by Rs. 3173 Lakhs during the year and the effect of impairment loss will be disclosed when the valuation will be done and the impairment can be calculated accurately.

The Management of the company i.e Liquidator is responsible for the matters stated in section 134(5) of the Companies Act 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act, read with Companies (Accounts) Rules, 2015.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating for ensuring accuracy and completeness of the accounting records relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management i.e Liquidator is responsible for assessing the Company's ability to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management i.e Liquidator either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- ☐ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ☐ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3) (i) of the Act, we are also responsible for explaining our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- ☐ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

□ Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

□ Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure B to the Independent Auditor's Report

Report on the Internal Financial Control under Clause (i) of Sub-section 3 of section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **K.S OILS Limited** Company under CIRP ("the Company") as on 31st March 2023 in conjunction with our audit of the financial statements of the company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management i.e Liquidator is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI").

These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India.

Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence has not been obtained and is not available so as to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the

transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Qualified Opinion

Due to inadequate staff and unavailability of relevant records, in our opinion, the Company does not have an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were not operating effectively as at 31st March, 2023. We have not been provided with the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

The RP/Liquidator/New Management is not making any representations regarding accuracy, veracity or completeness of the data or information in the financial statements.

28. Significant accounting policies:

The significant accounting policies applied by the Company in the preparation of its financial statements are listed below. Such accounting policies have been applied consistently to all the period (before CIRP) presented in the financial statements, unless otherwise indicated.

(i) Basis of preparation

a) Statement of compliance with Ind AS:

These financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to section 133 of the Companies Act, 2013 and the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Act.

b) Basis of measurement

These financial statements are prepared under the historical cost convention except for the following material items those have been measured at fair value as required by relevant Ind AS :

- certain financial assets and liabilities that are measured at fair value;
- defined benefit plans - plan assets measured at fair value;

Also, the fair values of financial instruments measured at amortised cost are required to be disclosed in the said financial statements.

Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value measurement:

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (that is, an exit price). It is a market-based measurement, not an entity-specific measurement. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

Notes on Financial Statements for the Year Ended 31st March 2023

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Where required/appropriate, external valuers are involved.

All financial assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy established by Ind AS113, that categorises into three levels, the inputs to valuation techniques used to measure fair value. These are based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly(i.e. as prices) or indirectly(i.e. derived from prices).

Level 3 inputs are unobservable inputs for the asset or liability.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

For financial assets and liabilities maturing within one year from the Balance Sheet date and which are not carried at fair value, the carrying amount approximates fair value due to the short maturity of these instruments.

The Company recognises transfers between levels of fair value hierarchy at the end of reporting period during which change has occurred.

c) Current non-current classification:

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

- The Company classifies all other liabilities as non-current.
- Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. Based on the nature of products / services and time between acquisition of assets for processing / rendering of services and their realization in cash and cash equivalents, operating cycle is less than 12 months. However, for the purpose of current/non-current classification of assets & liabilities period of 12months has been considered as normal operating cycle.

d) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates (i.e. the “functional currency”). The financial statements are presented in Indian Rupee, the national currency of India, which is the functional currency of the Company.

e) Rounding of amounts:

All amounts disclosed in the financial statements and notes are in Indian Rupees in lakhs rounded off as permitted by Schedule III to the Companies Act, 2013, unless otherwise stated.

(ii) Use of estimates

The preparation of financial statements in conformity with the recognition and measurement principles of the Ind AS requires management to make judgements, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues, expenses and the results of operations during the reporting period. Actual results could differ from those estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Such estimates & assumptions are based on management evaluation of relevant facts & circumstances as on date of financial statements. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period; they are recognised in the period of the revision and future periods if the revision affects both current and future periods.

(iii) Revenue recognition

Sale of goods

Revenue from sale of goods is recognised when all the significant risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract, which is mainly upon delivery and the amount of revenue can be measured reliably. The Company retains no effective control of the goods transferred to a degree usually associated with ownership and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods. Revenue is measured at fair value of the consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government which are levied on sales such as goods and services tax, value added tax, etc.

Interest Income:

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of a financial liability or a financial asset to their gross carrying amount.

Other Income:

In view of facts mentioned in Note 31, during the Corporate Insolvency Resolution Process (CIRP), only those receipts which have been actually realized in the designated bank account operated and maintained by the Resolution Professional (RP) have been recognized as 'Other

It is specifically noted that certain credits may appear in the Corporate Debtor's Form 26AS on account of tax deducted at source (TDS), but where the corresponding income has not been actually realized in the said account, such amounts have not been recognized as income in these financial statements. Only incomes which were realized by the RP/ Liquidator during the CIRP has been recognized in books of accounts as specified in IND -AS 115, Revenue Recognition, Revenue is measured at fair value of the consideration received or receivable and revenue is measured at fair value of the consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government which are levied on sales etc.

(iv) Fixed Assets

Fixed Assets is stated at acquisition cost net of accumulated depreciation and accumulated impairment losses, if any. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of Profit and Loss during the period in which they are incurred.

Cost of an item of fixed Assets comprises –

- i. its purchase price, including import duties and non –refundable purchase taxes (net of duty/ tax credit availed), after deducting trade discounts and rebates.
- ii. any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
- iii. borrowing cost directly attributable to the qualifying asset in accordance with accounting policy on borrowing cost.
- iv. the costs of dismantling, removing the item and restoring the site on which it is located.

PPE in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes direct costs, related pre-operational expenses and for qualifying assets applicable borrowing costs to be capitalised in accordance with the Company's accounting policy. Administrative, general overheads and other indirect expenditure (including borrowing costs) incurred during the project period which are not directly related to the project nor are incidental thereto, are expensed.

Fixed Assets which are not ready for intended use as on the date of Balance Sheet are disclosed as "Capital work-in-progress". They are classified to the appropriate categories of fixed Assets when completed and ready for intended use. Depreciation of these assets, on the same basis as other items of PPE, commences when the assets are ready for their intended use.

An item of fixed Assets is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of fixed Assets is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss.

The Company identifies and determines cost of each component/part of the plant and equipment separately, if the component/part has a cost which is significant to the total cost of the plant and equipment and has useful life that is materially different from that of the remaining plant and equipment.

Machinery spares which meets the criteria of PPE is capitalized and depreciated over the useful life of the respective asset.

Deemed cost on transition to Ind AS:

Under the Previous GAAP, all fixed Assets were carried at in the Balance Sheet on basis of historical cost, except leasehold land which was carried at revalued amount. The Company has

elected to continue with the carrying value of all of its fixed Assets recognized as of April 1, 2017 (the transition date) measured as per the previous GAAP and use such carrying value as its deemed cost as of the transition date.

Depreciation:

Depreciation on fixed assets (other than freehold land and capital work in progress) is provided on the straight line method on Plant Assets and Windmills, on rest of the assets depreciation is provided on Written down value method, based on their respective estimate of useful lives. The management believes that useful lives currently used, which is as prescribed under Schedule II to the Companies Act, 2013, fairly reflect its estimate of the useful lives and residual values of fixed assets.

Depreciation of an asset begins when it is available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases at the earlier of the date that the asset is retired from active use and is held for disposal and the date that the asset is de recognised.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Depreciation methods, useful lives and residual values are reviewed periodically including at the end of each financial year. Any changes in depreciation method, useful lives and residual values are treated as a change in accounting estimate and applied/adjusted prospectively, if appropriate.

(v) Intangible assets

Identifiable intangible assets are recognized when the Company controls the asset, it is probable that future economic benefits attributed to the asset will flow to the Company and the cost of the asset can be reliably measured.

At initial recognition, the separately acquired intangible assets with finite useful lives are recognised at cost of acquisition. Following initial recognition, the intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any.

Intangible assets not ready for the intended use on the date of the balance sheet are disclosed as 'intangible assets under development'.

An intangible asset should be derecognised (eliminated from the balance sheet) on disposal or when no future economic benefits are expected from its use and subsequent disposal.

Gains or losses arising from the retirement or disposal of an intangible asset should be determined as the difference between the net disposal proceeds and the carrying amount of the asset and should be recognised as income or expense in the statement of profit and loss.

Deemed cost on transition to Ind AS:

Under the Previous GAAP, all Intangible assets were carried at in the Balance Sheet on basis of historical cost. The Company has elected to continue with the carrying value of all of its intangible assets recognised as of April 1, 2017 (the transition date) measured as per the previous GAAP and use such carrying value as its deemed cost as of the transition date.

Amortisation:

Intangible assets are amortised on a straight line basis over the estimated useful lives of respective assets from the date when the asset are available for use, on pro-rata basis. Estimated useful lives by major class of finite- life intangible assets are as follows:

Type of Assets	Useful Life in Years

The amortisation period and the amortisation method for finite-life intangible assets is reviewed at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates and adjusted prospectively.

(vi) Financial instruments

Financial Assets:

Initial recognition and measurement:

Financial assets are recognised when the Company becomes a party to the contractual provisions of the instrument.

On initial recognition, a financial asset is recognised at fair value, except for trade receivables which are initially measured at transaction price. In case of financial assets which are recognised at fair value through profit and loss (FVTPL), its transaction costs are recognised in the statement of profit and loss. In other cases, the transaction costs are added to or deducted from the fair value of the financial assets.

Financial assets are subsequently classified as measured at

- amortised cost (if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding)
- fair value through profit and loss (FVTPL)
- fair value through other comprehensive income (FVTOCI).

Derecognition:

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the contractual rights to receive the cash flows from the asset.

Impairment of Financial Asset:

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the financial assets and credit risk exposures.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables. Simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition. This involves use of provision matrix constructed on the basis of historical credit loss experience and adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and the rates used in the provision matrix.

ECL is the difference between all contractual cash flows that are due to the group in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

Notes on Financial Statements for the Year Ended 31st March 2023

The Company measures the expected credit loss associated with its assets based on historical trend, industry practices and the business environment in which the entity operates or any other appropriate basis. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss.

Financial Liabilities and equity instruments:

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a company entity are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

Initial recognition and measurement:

Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument.

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The fair value of a financial instrument at initial recognition is normally the transaction price. If the Company determines that the fair value at initial recognition differs from the transaction price, difference between the fair value at initial recognition and the transaction price shall be recognized as gain or loss unless it qualifies for recognition as an asset or liability. This normally depends on the relationship between the lender and borrower or the reason for providing the loan. Accordingly, in case of interest-free loan from promoters to the Company, the difference between the loan amount and its fair value is treated as an equity contribution to the Company.

In accordance with Ind AS 113, the fair value of a financial liability with a demand feature is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

The Company's financial liabilities include trade and other payables and loans and borrowings including bank overdrafts.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Notes on Financial Statements for the Year Ended 31st March 2023

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss, unless and to the extent capitalised as part of costs of an asset.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Trade and other payables

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is currently enforceable legal right to offset the recognised amount and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

(vii) Preference shares

a. Convertible preference shares

Convertible preference shares are separated into liability and equity components based on the terms of the contract.

On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

b. Contingent Convertible preference shares

A contingent convertible preference shares is an instrument that is convertible, at the option of the holder, only on the occurrence of a contingent event outside of the control of the holder or the issuer. If the contingent event occurs then the holder has the option, but not the obligation, to convert. If the contingent event does not occur, then the instrument will be settled in cash at maturity/due dates.

Notes on Financial Statements for the Year Ended 31st March 2023

The fact that conversion is only contingent does not mean the instrument has no equity component. If, on occurrence of the contingent event, exercise of the conversion option would result in the exchange of a fixed number of the issuer's own equity instruments for a fixed amount of cash (in the functional currency of the issuing entity), the conversion option would meet the definition of an equity instrument under IAS 32 and the overall instrument would be treated as compound instrument.

Whether or not the contingency is within the control of the issuer is an important consideration when classifying financial instruments with contingent settlement provisions as either financial liabilities or equity.

If a contingent settlement provision is regarded as outside the control of the issuing entity, the instrument is classified as a liability by the issuer. If a contingent settlement provision is regarded as within the control of the reporting entity, the instrument will be classified as equity, provided that it has no other features requiring its classification as a liability and that the contingent settlement event is also outside the control of the holder.

(viii) Impairment of Non-financial assets

The carrying amounts of non-financial assets other than inventories are assessed at each reporting date to ascertain whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. An impairment loss is recognised, as an expense in the Statement of Profit and Loss, for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. Value in use is ascertained through discounting of the estimated future cash flows using a discount rate that reflects the current market assessments of the time value of money and the risk specific to the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels into cash generating units for which there are separately identifiable cash flows.

Impairment losses recognized in prior years are reversed when there is an indication that the impairment losses recognized no longer exist or have decreased. Such reversals are recognised as an increase in carrying amounts of assets to the extent that it does not exceed the carrying amounts that would have been determined (net of amortization or depreciation).

(ix) Borrowing costs

Borrowing costs comprises interest expense on borrowings calculated using the effective interest method and exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period.

The effective interest rate (EIR) is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. EIR calculation does not include exchange differences.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, included in the cost of those assets. Such borrowing costs are capitalised as part of the cost of the asset when it is probable that they will result in future economic benefits to the entity and the costs can be measured reliably.

Other borrowing costs are recognised as an expense in the period in which they are incurred. The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress.

Capitalisation of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are interrupted or completed.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

(x) Foreign currency transactions

The financial statements are presented in Indian Rupees (INR), the functional currency of the Company. Items included in the financial statements of the Company are recorded using the currency of the primary economic environment in which the Company operates (the 'functional currency').

Foreign currency transactions are translated into the functional currency using exchange rates at the date of the transaction. Foreign exchange gains and losses from settlement of these transactions, and from translation of monetary assets and liabilities at the reporting date exchange rates are recognised in the Statement of Profit and Loss.

Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

Under Previous GAAP, the Company had opted for paragraph 46A of Accounting Standard for 'Effect of Changes in Foreign Exchange Rates' (AS 11) which provided an alternative accounting treatment where by exchange differences arising on long term foreign currency monetary items relating to depreciable capital asset can be added to or deducted from the cost of the asset and should be depreciated over the balance life of the asset.

Ind AS 101 includes an optional exemption that allows a first-time adopter to continue the above accounting treatment in respect of the long-term foreign currency monetary items recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS financial reporting period as per the previous GAAP. The Company has elected to avail this optional exemption. However, the capitalization of exchange differences is not allowed on any new long term foreign currency monetary item recognized from the first Ind AS financial reporting period.

(xi) Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Company as a lessee

A lease is classified at the inception date as a finance lease or an operating lease.

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Finance lease:

Notes on Financial Statements for the Year Ended 31st March 2023

Assets held under finance leases are initially recognised as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's policy on borrowing cost. Contingent rentals are recognised as expenses in the periods in which they are incurred.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease:

In respect of assets taken on operating lease, lease rentals are recognized as an expense in the Statement of Profit and Loss on straight line basis over the lease term unless another systematic basis is more representative of the time pattern in which the benefit is derived from the leased asset or the payments to the lessor are structured to increase in the line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

(xii) Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition, are accounted for as follows:

- Raw materials, stores and spares: cost includes cost of purchase (viz. the purchase price, import duties and other taxes (other than those subsequently recoverable by the entity from the taxing authorities), and transport, handling and other costs directly attributable to the acquisition and is net of trade discounts, rebates and other similar items) and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
- Materials and other supplies held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.
- Spare parts, which do not meet the definition of fixed Assets are classified as inventory.
- Finished goods and work in progress: cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on first in, first out basis.
- Traded goods: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Obsolete, slow moving and defective inventories are identified from time to time and, where necessary, a provision is made for such inventories.

(xiii) Employee benefits

Short-term employee benefits:

at the amounts expected to be paid when the liabilities are settled and are expensed in the period in which the employee renders the related service.

Post-employment benefits:

i) Defined contribution plan

The defined contribution plan is postemployment benefit plan under which the Company contributes fixed contribution to a government administered fund and will have no obligation to pay further contribution. The Company's defined contribution plan comprises of Provident Fund, Employee State Insurance Scheme and Labour Welfare Fund. The Company's contribution to defined contribution plans are recognized in the Statement of Profit and Loss in the period in which employee renders the related service.

ii) Defined benefit plan

The Company's obligation towards gratuity liability is funded to an approved gratuity fund, which fully covers the said liability under Cash Accumulation Policy of Life Insurance Corporation of India (LIC). The present value of the defined benefit obligations is determined based on actuarial valuation using the projected unit credit method. The rate used to discount defined benefit obligation is determined by reference to market yields at the Balance Sheet date on Indian Government Bonds for the estimated term of obligations.

The amount recognised as 'Employee benefit expenses' in the Statement of Profit and Loss is the cost of accruing employee benefits promised to employees over the current year and the costs of individual events such as past/future service benefit changes and settlements (such events are recognised immediately in the Statement of Profit and Loss).

The amount of net interest expense calculated by applying the liability discount rate to the net defined benefit liability or asset is charged or credited to 'Finance costs' in the Statement of Profit and Loss.

Re-measurement of net defined benefit liability/ asset pertaining to gratuity comprise of actuarial gains/ losses(i.e. changes in the present value of the defined benefit obligation resulting from experience adjustments and effects of changes in actuarial assumptions), the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest)and is recognised immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Re- measurements are not reclassified to profit or loss account in subsequent periods.

Other long-term employee benefit obligations:

The liabilities for earned leave that are not expected to be settled wholly within 12 months are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of thereporting period that have terms approximating to the terms of the related obligation.

Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in the Statement of Profit and Loss. Accumulated leave, which is expected to be utilized within the next 12months, is treated as short term employee benefit.

(xiv) Government Grant:

Government grants are recognised only when there is reasonable assurance that the Company will comply with the conditions attaching to them and the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate.

Accordingly, government grants:

- a) related to or used for assets are included in the Balance Sheet as deferred income and recognised as income in profit or loss on a systematic basis over the useful life of the assets.
- b) related to an expense item is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

In the unlikely event that a grant previously recognized is ultimately not received, it is treated as a change in estimate and the amount cumulatively recognised is expensed in the Statement of Profit and Loss.

(xv) Corporate Social Responsibility

The Company is not required to spend towards Corporate Social Responsibility (CSR) as per Section 135 of the Companies Act, 2013, since there is no average profit in the last 3 years calculated as per the provisions of the Act.

(xvi) Taxation

Tax expense comprises of current and deferred tax and includes any adjustments related to past periods incurrent and/or deferred tax adjustments that may become necessary due to certain developments or reviews during the relevant period.

Current income tax:

Tax on income for the current period is determined on the basis of taxable income (or on the basis of book profits wherever minimum alternate tax is applicable) and tax credits computed in accordance with the provisions of the Income Tax Act 1961, and based on the expected outcome of assessments/appeals.

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the company operates and generates taxable income.

Current income tax relating to items recognised, either in other comprehensive income or directly in equity, is also recognized in other comprehensive income or in equity, as appropriate and not in the Statement of Profit and Loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred tax:

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Notes on Financial Statements for the Year Ended 31st March 2023

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses & unabsorbed tax depreciation. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred Tax Assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax assets in the Balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realised.

(xvii) Provisions and contingencies

Provisions:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date.

If the effect of the time value of money is material, provisions are discounted to reflect its present value using a current pre-tax rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost. Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement.

Related party transactions and outstanding balances disclosed in the financial statements are in accordance with the above definition as per Ind AS 24.

(xx) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short term deposits/investments with an original maturity of three months or less from the date of acquisition, which are subject to an insignificant risk of changes in value. These exclude bank balances (including deposits) held as margin money or security against borrowings, guarantees etc. being not readily available for use by the Company.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits and exclude items which are not available for general use as on the date of Balance Sheet, as defined above, net of bank overdrafts which are repayable on demand where they form an integral part of an entity's cash management.

Ordinary shares that will be issued upon the conversion of a mandatorily convertible instrument are included in the calculation of basic earnings per share from the date the contract is entered into. Contingently issuable shares are treated as outstanding and are included in the calculation of basic earnings per share only from the date when all necessary conditions are satisfied (i.e. the events have occurred).

Diluted earnings per equity share are computed by dividing the net profit or loss before OCI attributable to equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares (including options and warrants). The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value. Dilutive potential equity shares are deemed converted as of the beginning of the period unless issued at a later date.
